

Michigan Rehabilitation Association and  
Michigan Rehabilitation Counselors and Educators Association Present:

# Ethics & Emerging Technology in VR

Monday 7/21-  
10-11:30am

## Part 1: Overview of Ethics in Emerging Technology

- Define key technology concepts and explore their relevance to vocational rehabilitation.
- Examine ethical principles—beneficence, autonomy, justice—and how they apply to emerging technologies.
- Identify potential risks and biases in technology-driven VR applications.

Monday 7/28-  
10-11:30am

## Part 2: Applicable Tech Strategies in Vocational Rehabilitation

- Demonstrate practical tech tools for enhancing vocational assessments and program planning.
- Review case studies illustrating ethically sound tech implementations in VR contexts.
- Outline best practices for responsible tech deployment, including data privacy and stakeholder communication.
